FOR IMMEDIATE RELEASE

WorkOnMyNetwork introduces IT Infrastructure Management for MSP

WorkOnMyNetwork, an Indian Offshore IT Infrastructure Management Specialists introduces, special set of services in the remote managed space for other first-hand IT Managed Services Providers (MSP's) serving the SME (Small & Medium Enterprise) market.

Managed Service Providers are always faced with challenges to provide better services to its clients, add value proposition and keep the costs predictable. Whilst the end customer always wants reduced downtime, lowest mean time to repair, always available and highest standards of customer service; it has become extremely difficult to provide such services in this competitive environment. By outsourcing the IT Infrastructure Management to WorkOnMyNetwork, Managed Service Providers will be able to address these challenges and partner with a reliable service provider.

"We are very delighted to introduce highly competitive plans with measurable deliverables for Managed Service Providers. By introducing these services WorkOnMyNetwork will be able to further strengthen its position in the IT Infrastructure Management space and will ultimately result in the benefit for both the Service Provider and the Services Receiver." says Rathin Vaidya, Vice-President (Tech), SourcePro Infotech.
